

MIRASOL FIRE & POLICE STATION

PALM BEACH GARDENS, FLORIDA

Within the Mirasol Development is a 2-acre community facility site located on the east side of Jog Road, north of the Mirasol Walk Shopping Center. This facility is 8,604 square feet for use by both the fire and police departments to service the residents of Mirasol and their surrounding neighbors. Urban Design Studio was commissioned by the master community developer, Taylor Woodrow Communities as Land Planners. UDS worked closely with the Fire Chief, Police Department, project architects, landscape architects, and engineers throughout the Site Plan Review Approval process to secure approval from the City of Palm Beach Gardens.

As Project Planner, UDS was successful in processing and gaining the necessary governmental approvals for this site including architectural, landscape, signage, parking, traffic, and drainage design elements, as well as CPTED compliance. The facility also hosts a community meeting room, was constructed by the developer and then dedicated to the City of Palm Beach Gardens in 2002.
